*Allowable Subject Matter*

1. Claims 1-30 are allowed.
2. The following is an Examiner's Statement of Reasons for Allowance:

In interpreting the claims, in light of the specification and the applicant's arguments filed January 3, 2005, the Examiner finds the claimed invention to be patentably distinct from the prior art of record.

The prior art of record fails to teach or suggest individually or in combination a system and method comprising "setting a second pair of delimiters as second starting and closing indicators to turn off any delimiter occurring in a second string between the second starting and closing indicators..."

The examiner finds the Applicant's arguments found in the response of January 3, 2005 to be persuasive. The applicant argued in substance that the prior art of record does not teach a method comprising setting pairs of delimiters as starting and closing indicators to turn off any delimiter occurring in the a first string between the starting and closing indicators, as recited in claim 1 (See Arguments, page 9). The Applicant distinguished the prior art by arguing Gleason provides for nesting delimiters, however, the nested delimiters are not turned off, i.e. they are encoded/decoded by the system. The examiner agrees.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for
